

10 Sketches for our game

LITTLE LÄRRI

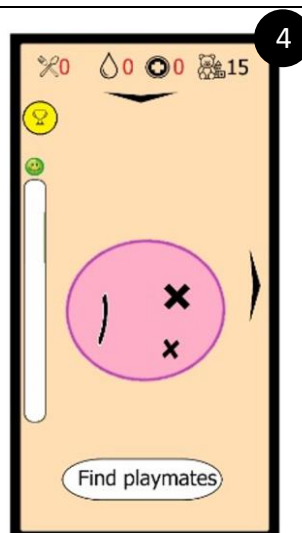

When you open the game, you will see the Start Screen:

If you do not feed Lärri regularly or give him his medication, he will get hungry or sick:

If you still don't help him in this state, then he might die and you lose the game, so you better take care of him!

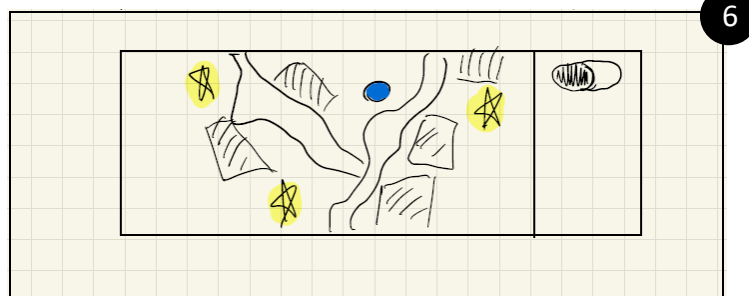

How can you help and develop him? You need to collect resources and give them to him! You get resources by trading with others or by picking them up at certain locations in your world:
